## Looking Ahead to 2020

2019 was another strong year for investors, but the daily headlines kept investors on the edge of their seats. Trade wars, recession fears, geopolitical unrest, interest rate concerns and U.S political division all kept us wondering how each one would affect equity markets. The year also included its share of volatility in the U.S. equity markets which left many investors nervous. Despite a backdrop of concern, during the year, many indexes continued to set new highs. For 2020, investors should consider the mantra of “proceed with caution.”

In our second year of The Tax Cuts and Jobs Act, taxpayers are still adjusting to new tax forms. The direction of interest rates, stock market volatility, a Presidential election and the continuation of potential trade wars could provide disruption for investors in 2020. Having a solid foundation, design and strategy is critical to the outcome of your financial plans. Keeping your plan up to date is always wise and will be especially integral. We are staying updated on the issues that may affect your personal situation. Our prime mission is to provide our clients with guidance and support on the road to their financial goals.

**This is a good time to review and discuss your plans with us.** We can help you determine if you’re still on track to meet your long-term objectives, confirm your time horizons and your risk tolerance. If you have any questions or concerns, please call our offices and we’d be happy to assist you.

## Specific Areas to Watch in 2020

### Interest Rate Changes

In 2019, the Fed lowered interest rates for the first time in a decade. In July, September and October, the Federal Reserve lowered its key interest rate by 0.25% (0.75% total). Fed Chair Powell, said that the October decision to lower rates was intended to, “provide some insurance against ongoing risks.” At the December 2019 meeting, the Fed signaled that it was likely to hold rates steady in 2020. Low interest rates can make equities look attractive for investors seeking returns. For 2020, we will continue to keep a close eye on interest rate changes.

### Trade War Fears

In December, China and the U.S. agreed to work towards a trade agreement. The uncertainty around the trade relationship between the U.S. and China has dampened global growth, according to

Paul Gruenwald, Chief Economist at S&P Global Ratings. This trade war, which has lasted for almost two years, has weighed heavily on global economic growth, according to the International Monetary Fund. Analysts worry that tariffs could result in higher prices on goods and therefore affect consumer spending, which accounts for about two-thirds of the U.S. economy. In 2020, investors need to stay watchful on U.S. and China trade negotiations.

### Stock Market Valuations

Analysts theorize that valuations are one of the key predictors of equity returns. For the last decade, equities have climbed higher. Investors who need access to their money in the next 10 years should understand that current valuations could lead to a period of lower returns and therefore need to plan accordingly. Risk is a part of investing and investors need to balance current conditions with their personal tolerance for risk. Although equity prices can continue to rise, we must understand that its near impossible to accurately predict short term moves and we need to continue to carefully monitor equity markets

### Your Personal Situation

Your personal situation is our highest concern. We make it a priority to keep our clients informed throughout the year. If you’d like to schedule a complimentary consultation, please call our office and we will be glad to schedule time with you. Please keep in mind that each individual or household situation is different and we want to help you with your personal financial goals in 2020.
